SERAH REIKKA

ABOUT

Hey!

I am Serah Reikka freelancer as **CGI Artist, Game Designer** and **developer** in the technologies of virtual reality and augmented reality (professional application).

I had the opportunity in my professional career to work with big name of entertainment industries such as Disney, Universal and others.

I invite you to visit my different portfolio listed below :)

If you have any questions feel free to contact me.

Serah Reikka -

CGI CHARACTERS

You are looking for a fully CGI characters like Lilmiquela or even Tanos from Marvel ? You are in the right place !

All of my CGI characters is designed following a details process :

- Understand your project and idea's.
- Helping you by the best strategy for design your idea
- Proposing a complete moodboard of you character

I propose 2 kind of CGI characters according from my experience and the needs of my customers.

**PLUS D'INFO'S
NOTES :**

PLUS INFO'S NOTES :

The first one is to design a fully complete CGI character, head, body, clothes, jewelry, make up and tatoo.

My professional model Serah Fei was designed by this way and I invit you to check her social media for more informations (below).

The second process is to use the «CGI/VFX» way to design your character like Lilmiquela. It means that ONLY the head are in CGI. The rest of the body is a real actor with real outfit and environment.

One of my cutomers « Cade Harper» was designed on this way (100K Followers by now). I designed a complete CGI head and we use a profesionnal real model for various pictures and pose. Exactly as lilmiquela. Cade Harper is famous in USA with more than 100K followers in Instagram.

Here how I manage to design a CGI/VFX picture.

Firstly I will need real pictures from your real model (it could be in studio, outside, inside etc) shoot by a photographer.

Secondly thanks to Autodesk Maya and Adobe photoshop I will be able to track your real model and replace the real head by the CGI head keeping the position of the real head + the ambient light.

Your CGI character could also have CGI animation. Head and full body :)

3D VFX VIDEO

MATCHMOVING & CAMERA TRACKING

In visual effects, match moving is a technique that allows the insertion of computer graphics into live-action footage with correct position, scale, orientation, and motion relative to the photographed objects in the shot.

The term is used loosely to describe several different methods of extracting camera motion information from a motion picture. Sometimes referred to as motion tracking or camera solving, match moving is related to rotoscoping and photogrammetry

Match moving is primarily used to track the movement of a camera through a shot so that an identical virtual camera move can be reproduced in a 3D animation

PLUS D'INFO'S NOTES :

PLUS INFO'S NOTES :

program. When new animated elements are composited back into the original live-action shot, they will appear in perfectly matched perspective and therefore appear seamless.

If you want to give a realistic looking using video format, the matchmoving method is the best options. Used on all cinema industry to integrate real content into a CG, the 3D VFX will give a second breath for your project such as a virtual model.

Having a living CG model in video will definitively make your project unique and strongly realistic compared your competitions.

Most of CG virtual model are only made in «picture» format because having access to the 3D VFX method is complicated and expensive for small and medium company.

With Reikka Design, I give the best price from small company and medium company to let them reach this high technology and high-end quality for their projects.

Here some sample made for Serah Fei Reikka :

<https://youtu.be/iJT6EZCv9KY> - Serah's voice intro

<https://youtu.be/vIUwsbmg-lw> - Shop advertising

<https://youtu.be/Sp-MbB6bbqk> - Live photoshooting

GAME DESIGN

As a CGI Artist & Game designer it is important to have knowledge on the video game industries to support our customers on their projects.

According to my experience, I can propose any kind of work as game designer such as :

- Designing an High poly model (ex: characters).
- Fully rigged for animation.
- Game ready for UE4 or Unity 3D

I'm able to design (+level design) from scratch or any plans an environment on game engines (UE4 and Unity 3D).
